Who We Are

Broeck Citizenship was founded with a clear mission: to simplify the journey to second citizenship.

We understand the complexities of international law, due diligence, and program eligibility and we turn them into clear, actionable steps.

Our multilingual and globally connected team brings together legal professionals, investment advisors, and client care experts.

Together, we ensure a seamless and transparent application process tailored to your unique needs.

Why Second Citizenship?

A second citizenship is a practical, legal strategy used by families, entrepreneurs, and professionals worldwide to expand freedom of movement, protect wealth, and secure options for future generations. Each program below offers a legally established route to a second passport in exchange for a qualifying economic contribution with no lengthy naturalization process, and in most cases, no need to give up your existing citizenship.
